<tr>
<td>- Compare and order a collection of objects, using standard units of mass (i.e., gram, kilogram) and/or capacity</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
- Determine, through investigation, the relationship between millilitres and litres

- Determine, through investigation, the relationship between grams and kilograms

- Select and justify the most appropriate standard unit to measure mass (i.e., milligram, gram, kilogram, tonne)

- Solve problems involving the relationship between a 12-hour clock and a 24-hour clock

- Solve problems involving the relationship between years and decades, and between decades and centuries

- Compare, using a variety of tools, two-dimensional shapes that have the same perimeter or the same area

- Create, through investigation using a variety of tools and strategies, two-dimensional shapes with the same perimeter or the same area

- Determine, through investigation using stacked congruent rectangular layers of concrete materials, the relationship between the height, the area of the base, and the volume of a rectangular prism, and generalize to develop the formula (i.e., \( \text{Volume} = \text{area of base} \times \text{height} \))

- Determine, through investigation using a variety of tools and strategies the relationship between the height, the area of the base, and the volume of a triangular prism, and generalize to develop the formula (i.e., \( \text{Volume} = \text{area of base} \times \text{height} \))

- Determine, through investigation using a variety of tools and strategies, the surface area of rectangular and triangular prisms

- Solve problems involving the estimation and calculation of the surface area and volume of triangular and rectangular prisms

- Select and justify the most appropriate standard unit to measure the capacity of a container (i.e., millilitre, litre)

- Determine, through investigation, the relationship between grams and kilograms

- Solve problems involving the relationship between a 12-hour clock and a 24-hour clock

- Compare, using a variety of tools, two-dimensional shapes that have the same perimeter or the same area

- Create, through investigation using a variety of tools and strategies, two-dimensional shapes with the same perimeter or the same area

- Determine, through investigation using stacked congruent rectangular layers of concrete materials, the relationship between the height, the area of the base, and the volume of a rectangular prism, and generalize to develop the formula (i.e., \( \text{Volume} = \text{area of base} \times \text{height} \))

- Determine, through investigation using a variety of tools and strategies the relationship between the height, the area of the base, and the volume of a triangular prism, and generalize to develop the formula (i.e., \( \text{Volume} = \text{area of base} \times \text{height} \))

- Determine, through investigation using a variety of tools and strategies, the surface area of rectangular and triangular prisms

- Solve problems involving the estimation and calculation of the surface area and volume of triangular and rectangular prisms
Ms. Vanstone asks her students to draw a rectangle and a square with the areas and perimeters given below.

<table>
<thead>
<tr>

Which shows two correct drawings?

- a
- b
- c
- d
4. Frank measures the width of a desk by using a metre stick. He marks a spot on the metre stick to indicate the width of the desk, as shown below.

Which is closest to the width of the desk?

F 0.70 metres
G 0.75 metres
H 15 centimetres
J 80 centimetres

16. Sometimes measurement can be estimated, and at other times it must be very accurate. A list of locations where running times might be measured is shown below.

1. Olympics
2. on the playground
3. school track meet

Which list shows the locations in order from the greatest to the least need for accuracy?

F 3, 2, 1
G 3, 1, 2
H 1, 2, 3
J 1, 3, 2
19. The time spent on which of the following activities would **best** be measured to the nearest hundredth of a second?

   a. playing at recess
   b. walking to school
   c. working on homework
   d. running a 50-metre race
19. What is the area of the triangle shown below?

- a) 60 cm²
- b) 65 cm²
- c) 120 cm²
- d) 156 cm²
Samantha spills a milkshake on a rectangular piece of paper as shown below.

Which of the following best approximates the area of the entire spill?

- a 100 cm$^2$
- b 300 cm$^2$
- c 400 cm$^2$
- d 600 cm$^2$
Which is equivalent to 1 m$^2$?

a. 10 cm$^2$

b. 100 cm$^2$

c. 1000 cm$^2$

d. 10 000 cm$^2$
Consider the line segment below.

Which of the following is closest to its length?

a  3.7 cm
b  4.2 cm
c  47 mm
d  57 mm
GRADE SIX EQAO QUESTIONS: Measurement
Overall Expectation #2
Spring 2006

1. Which is the most appropriate unit of measurement to describe the area of the floor of a gym?
   a. km²
   b. cm³
   c. m² *
   d. m³

2. Joseph has a measuring wheel that clicks once for every metre he walks. How many times will the wheel click when Joseph walks 2.6 km?
   a. 2
   b. 26
   c. 260
   d. 2600 *
18. Four students calculate the volume of the shoe box shown below.

The following number sentences show the students' calculations. Which calculation is correct?

a. $15 \text{ cm} \times 20 \text{ cm} = 300 \text{ cm}^2$

b. $20 \text{ cm} \times 30 \text{ cm} = 600 \text{ cm}^2$

c. $20 \text{ cm} + 30 \text{ cm} + 15 \text{ cm} = 65 \text{ cm}^3$

d. $15 \text{ cm} \times 20 \text{ cm} \times 30 \text{ cm} = 9000 \text{ cm}^3$ *

* Indicates the correct answer.
21. A cube is shown below. It is 10 cm wide, 10 cm long and 10 cm high.

What is the area of one of the faces of the cube?
- a. 10 cm\(^2\)
- b. 30 cm\(^2\)
- c. 100 cm\(^2\) *
- d. 1000 cm\(^2\)

22. Sam buys 4 items in a store. The mass of each item is recorded below.

9000 mg, 400 g, 0.04 kg, 0.009 kg

Which item has the greatest mass?
- a. 9000 mg
- b. 400 g *
- c. 0.04 kg
- d. 0.009 kg
Twelve cubes measuring 3 cm by 3 cm by 3 cm fit perfectly into the rectangular prism shown below.

What is the volume of the rectangular prism in cm³?

a  36 cm³
b  162 cm³
c  288 cm³
d  324 cm³ *
Susie wants to tile the floor of her family’s rectangular play room. The tiles she plans to use are 10 cm by 10 cm squares. A drawing of the room is shown below.

How many of the square tiles will Susie need to cover the floor of the play room?

Show your work.

Susie will need ___________ tiles.
3. The dimensions of a rectangular prism are shown below.

- 5 cm wide
- 4 cm long
- 4 cm high

What is the total surface area of this rectangular prism?

A. 57 cm²
B. 80 cm²
C. 96 cm²
D. 112 cm²
An artist has some paintings that are rectangular and some that are parallelograms. One of her paintings is shaped like the rectangle shown below.

![Rectangle with dimensions 50 cm by 30 cm]

Which of the following parallelograms has the same area as the rectangle?

A

![Parallelogram A with dimensions 50 cm by 20 cm]

B

![Parallelogram B with dimensions 30 cm by 40 cm]

C

![Parallelogram C with dimensions 50 cm by 30 cm]

D

![Parallelogram D with dimensions 20 cm by 30 cm]
24 A box of modelling clay that weighs 3.5 kg is divided equally among 14 students. How many grams does each student receive?

F 0.25 g
G 4 g
H 49 g
J 250 g

25 Cynthia purchases a tent for her camping trip, as shown below. During one night of the camping trip, it rains. The floor of the tent is the only part that stays dry.

What is the area of the part of Cynthia’s tent that gets wet?

A 10.84 m²
B 12.23 m²
C 15.01 m²
D 16.96 m²
36. Four triangles are shown on the grid below.

Which triangle has an area of 18 square units?

F  Triangle 1
G  Triangle 2
H  Triangle 3
J  Triangle 4
10 Jude's fish tank, shown below, holds 100 000 cm³ of water when full. Jude decides to pour in water to a height of 5 cm below the top of the tank.

How much water, in cm³, will Jude need to pour into the tank so that the water is 5 cm below the top?

Show your work:
3. What is the total surface area of the rectangular prism below?

\[1\text{ cm} \quad 2\text{ cm} \quad 3\text{ cm}\]

- a. 6 cm\(^2\)
- b. 11 cm\(^2\)
- c. 16 cm\(^2\)
- d. 22 cm\(^2\)

4. What is the area of a parallelogram with a height of 2 m and a base of 3.5 m?

- a. 1.75 m\(^2\)
- b. 3.50 m\(^2\)
- c. 7.0 m\(^2\)
- d. 11.0 m\(^2\)
20. Mr. Clarke wants to tile a floor that is 6 metres long and 4 metres wide. The dimensions of each square tile are 20 cm by 20 cm. What is the minimum number of tiles that Mr. Clarke will need to tile the entire floor?
   a. 24
   b. 400
   c. 600
   d. 1200

21. Which of the following would be the most appropriate metric unit to measure the length of Johann’s arm?
   a. decimetre
   b. decametre
   c. millimetre
   d. kilometre

33. A group of 6 people equally shares 12 litres of juice. How many millilitres of juice does each person receive?
   a. 2
   b. 72
   c. 2000
   d. 12 000
A pool in the shape of a rectangular prism is shown below.

How many litres of water are needed to completely fill the swimming pool?

a  500 000
b  50 000
c  5000
d  500
Daneen builds a model train with 5 cubes as shown below. The dimensions of each cube are 2 cm × 2 cm × 2 cm.

Daneen wants to paint the outside of the model train with red paint. The cost to paint 1 cm² of the train is $0.75. How much will it cost to paint the outside of the model train?

Show your work.
3. Rebecca creates a net of a rectangular prism, as shown below.

![Rectangular Prism Net]

What is the total surface area of the rectangular prism?

- a 450 cm²
- b 600 cm²
- c 650 cm²
- d 750 cm²

4. Ravi makes 2.80 L of pudding. He wants to completely fill 350 mL cups with pudding. Which of the following expressions can be used to find how many 350 mL cups Ravi can fill?

- a $2.80 \times 1000 \div 350$
- b $2.80 \times 1000 + 350$
- c $2.80 \times 350 \times 1000$
- d $2.80 \times 350 \div 1000$
20. Elda has a rectangular piece of paper with an area of 0.12 m\(^2\). She cuts this piece of paper into small rectangles each with an area of 200 cm\(^2\).

What is the maximum number of these small rectangles that Elda can cut?

a. 6
b. 12
c. 24
d. 60

21. A diagonal of a parallelogram is drawn forming 2 triangles. If the area of one of the triangles is 34 cm\(^2\), what is the area of the parallelogram?

a. 17 cm\(^2\)
b. 34 cm\(^2\)
c. 68 cm\(^2\)
d. 136 cm\(^2\)
Which expression can be used to find the area of the shaded region?

- a. \( \frac{54}{2} - 12 \)
- b. \( 54 - 4 \times 12 \div 2 \)
- c. \( 12 \div 2 - 54 \)
- d. \( 12 - 54 \div 2 \)
Determine the area of the parallelogram below.

The area of the parallelogram is ________________.

Draw a triangle and a rectangle each with the same area as the parallelogram. Use the grid below.

Justify your answers.
GRADE SIX EQAO QUESTIONS: Measurement
Overall Expectation #2
Spring 2010

3. Enrico pours 80 L of water into 200 mL cups. If he fills the cups completely, how many cups does he fill?
   a. 250
   b. 400
   c. 2500
   d. 4000

4. Which parallelogram has an area of 24 m² and a perimeter of 28 m?
   a. 
   b. 
   c. 
   d. 
GRADE SIX EQAO QUESTIONS: Measurement
Overall Expectation #2
Spring 2010

19  Which unit of measure is most appropriate to describe the length of a page in a textbook?
   a  centimetre
   b  kilometre
   c  metre
   d  millimetre

21  Which is equivalent to 1 m²?
   a  10 cm²
   b  100 cm²
   c  1000 cm²
   d  10 000 cm²
Look at the two parallelograms below.

What is the minimum number of small parallelograms needed to cover the larger parallelogram completely?

a 16
b 63
c 126
d 252
24 A turkey weighs 9.75 kilograms. It takes about 20 minutes to cook 500 grams of this turkey. Approximately how many minutes does it take to cook the whole turkey?
   
   a  39
   b  74
   c  390
   d  488

35 Look at the parallelogram below.

Dylan wants to split the parallelogram into two congruent triangles.

Which expression can he use to find the area, in square centimetres, of each triangle?

   a  \((25 \times 5) \div 2\)
   b  \((25 \times 5) \times 2\)
   c  \((25 \times 13) \div 2\)
   d  \((25 \times 13) \times 2\)
Determine the area of the unshaded part of the rectangle below. Use a ruler.

Justify your answer.

The area of the unshaded part of the rectangle is ____________.
Jacob paints the outside of the rectangular prism below, except for the bottom.

What is the total area that he paints?

a  108 cm$^2$

b  123 cm$^2$

c  132 cm$^2$

d  150 cm$^2$
Consider the parallelogram below.

Which expression can be used to find the area, in square centimetres, of this parallelogram?

a) $5 \times 2$
b) $5 \times 3$
c) $2 + 3 + 5$
d) $3 + 5 + 3 + 5$
The measurements of a triangular prism are shown below in centimetres.

One face has an area of 12 cm$^2$. Another face has an area of 60 cm$^2$.

What are the areas, in cm$^2$, of the remaining 3 faces?

a  12, 12, 50
b  12, 12, 60
c  12, 50, 50
d  12, 60, 60
19. Which shape below has an area of 12 cm²?

a. 

```
   2 cm
   / |
  6 cm
   | |
```

b. 

```
  3 cm
  / |
 3 cm
```

c. 

```
  2 cm
  / |
 4 cm
```

d. 

```
   2 cm
   / |
  6 cm
   | |
```
24 Ming makes 4.8 litres of lemonade.

   How many millilitres does she make?
   
   a  0.048
   b  0.48
   c  480
   d  4800

34 Consider the triangular prism pictured below.

   The area of the triangular base is 36 cm². The volume of the triangular prism is 396 cm³.

   What is the height of the triangular prism?
   
   a  6 cm
   b  9 cm
   c  11 cm
   d  12 cm
27 Jackie fills the triangular prism pictured below with water. Then she empties the water into a rectangular prism.

![Triangular prism diagram]

Determine the number of times that Jackie must fill the triangular prism with water to fill a rectangular prism that is 10 cm long, 2 cm wide and 12 cm high.

Justify your answer.
